SHREYASH ATRE

Full-Stack Developer | NestJS/Node.js · React · PostgreSQL · REST APIs

Pune, Maharashtra | shreyashatre16@gmail.com | linkedin.com/in/shreyash-atre-901340317 | shreyash0216.github.io/Shreyash_Portfolio | github.com/shreyash0216

PROFILE

Final-year B.Sc. Computer Science student (CGPA 8.68) who has shipped production full-stack systems solo — backend, frontend, database, deployment, and QA — on the same JS/TS stack this role runs on (Node.js/NestJS, React, PostgreSQL). Comfortable setting up a project from scratch and owning it through to a live client using it daily. Available immediately, full-time, in-office in Pune.

EXPERIENCE

Independent Project Lead — Full-Stack Development Jun 2026 – Present

Syantrex (Independent / Pre-Registration), Pune

- Built and shipped a production retail SaaS application solo — Node.js/Express backend, PostgreSQL database, React-based frontend, JWT auth with bcrypt hashing, and role-based access control (RBAC).
- Set up the project from scratch and deployed it to a DigitalOcean production droplet, with Render.com as a staging/fallback environment.
- Ran the full pre-launch QA pass myself — used Postman to test API endpoints end-to-end and caught 5 release-blocking issues (release build signing, image memory/OOM handling, hashing consistency) before go-live.
- Currently architecting a multi-tenant SaaS admin panel on NestJS, PostgreSQL, React, JWT/bcrypt, RBAC, and Socket.IO as a parallel workstream.

Web & Software Development Intern Jun 2026 – Aug 2026

Moash, Pune (Hybrid) — reporting to Founder & CEO

- Worked within a multi-tenant SaaS product built on Next.js, TypeScript, and Supabase, auditing all 96 features against spec and compiling findings that informed engineering priorities.

App Development Intern Dec 2025 – Jun 2026

Careasa Healthcare

- Built 15+ production REST APIs using Node.js/Express with JWT authentication, achieving 99%+ cross-platform data reliability across web and mobile clients.
- Debugged production config issues end-to-end, including a Node.js/Sequelize/PostgreSQL connection failure traced to missing environment variables.

AI Automation Intern Jun 2026 – Jul 2026

IBM SkillsBuild × AICTE (Bharat Cares) — Credential ID BHIBMAC01877

- Completed a 6-week structured program on automation pipelines and workflow orchestration.

EDUCATION

B.Sc. Computer Science — Sir Parashurambhau College, Pune 2024 – 2027

CGPA: 8.68 / 10.0

ACHIEVEMENTS & BUILDING UNDER PRESSURE

- AWS ImpactX Challenge, IIT Bombay Techfest 2025 — full React rewrite of an ML-powered frontend (10 crop varieties) preserving the existing prediction engine and Gemini API integration, within a fixed hackathon timeline (Team COSMOS).
- 2nd Prize, SP College Science Exhibition 2026 — built and presented a working product end-to-end against 10+ competing teams.
- Top 9 rank, SPPU Inter-College CS Quiz — across DSA, DBMS, OS, CN, and AI/ML domains.
- Certificate of Excellence, DevOps Workshop — SPPU ACM Student Chapter (September 2026) — covered DevOps culture, automation workflows, and CI/CD pipelines.

SKILLS

Backend: Node.js, Express.js, NestJS, REST API design, JWT/bcrypt auth, RBAC, Socket.IO

Frontend: React, Next.js, TypeScript, JavaScript

Database: PostgreSQL, Supabase

DevOps & Tools: Git, Postman, DigitalOcean, Render.com, CI-style release management

Foundations: Data Structures & Algorithms, structured manual/API testing
